Leadership Survival... On The Edge

The Trust Edge

David Horsager

"The single uniqueness of the greatest leaders and organizations of all time is Trust"

Trust is a fundamental, bottom line issue. Without it, leaders lose teams, sales people lose sales, and organizations lose reputation, retention of good people, relationships and revenue. But with trust, individuals and organizations enjoy greater creativity, productivity, freedom, and results. Through academic research and firsthand experience, David Horsager has learned what it takes to gain – and keep – The Trust Edge. Through a captivating presentation, David combines humor and illustrations with business insight and analysis. He will show you how the little things, done consistently, add up to huge results. Attendees will walk away with concrete steps they can immediately use to improve their lives and careers.

Seven Rules of Admiral Hyman Rickover

Gordon Graham

Integrating "Real" Risk Management into your Daily Operations

Admiral Hyman Rickover is known as the "Father of the Nuclear Navy." This portion of the U.S. Navy has a reputation for excellence as well as a phenomenal safety and reliability record. Admiral Rickover developed rules for success in dealing with the risks he faced in working with nuclear power.

FRIDAY - March 7, 2014

8:30 AM Session

Leadership for Reducing Organizational Stress

Kevin Gilmartin

"Supervisors should not confuse investment in the police role with productivity"

This presentation addresses the dynamics that can transform within a matter of a few years, idealistic and committed public safety professionals into cynical, angry individuals who begin having difficulties in both the personal and professional aspects of their lives. The course outlines the issues that can potentially see employees engaging in inappropriate behavior patterns and decision-making that leads to both administrative and can unfortunately in some personnel, criminal difficulties. The purpose of the class is to provide information that lets the leader see how the deterioration process can take place and what specific preventative strategies can be employed.
